| 1.   | Implementation                 | 04          |
| 2.   | Monitoring, Reporting & Review | 04          |

Serentica consider climate change as one of the greatest challenges facing the world today. As a renewable energy company, we are committed to being part of the solution by reducing greenhouse gas (GHG) emissions, promoting clean energy, and building resilience in our operations and communities.

Through this policy, Serentica reaffirms its role as a responsible renewable energy leader committed to climate action, delivering clean energy solutions while ensuring resilience and sustainable growth for future generations.

Serentica is committed to:

- **Decarbonization:** Accelerating the transition to a low-carbon economy through renewable energy development and collaborating with suppliers, contractors, and partners to reduce carbon footprints.
- **Emission Reduction:** Measuring, managing, and reducing GHG emissions across operations and its value chain partners.
- **Climate Resilience:** Identifying and mitigating climate-related risks (physical, transitional, regulatory, and market) to safeguard business continuity.
- **Innovation:** Leveraging technology and innovation to improve energy efficiency and integrate climate-friendly solutions.
- **Awareness:** Building capacity and raising awareness among employees, communities, and stakeholders on climate action.
- **Compliance:** Adhering to national and international climate policies, including India's NDCs, SEBI's BRSR, and global frameworks such as TCFD, UNGC, and SDGs.

## 1. Implementation

To achieve above commitments, Serentica will:

- Conduct GHG inventories and disclose emissions performance transparently.
- Integrate climate risk assessments into business planning and investment decisions.
- Adopt renewable and energy-efficient technologies across all operations.
- Incorporate circular economy principles (waste reduction, water efficiency, recycling, and responsible resource use).
- Engage in carbon offset projects and nature-based solutions where unavoidable emissions occur.
- Promote climate-smart practices across the supply chain.

## 2. Monitoring, Reporting & Review

- Progress on climate-related initiatives will be monitored regularly and reported annually through ESG/BRSR disclosures.
- The ESG Committee and Board of Directors will oversee performance, risks, and strategic direction.
- This policy will be reviewed periodically to align with evolving science, regulatory requirements, and stakeholder expectations.
